DETAILED ACTION

Specification

1. Applicant's amendment to the ABSTRACT and specification are accepted. Accordingly the Objections set forth in sections 1-3 of the previous Office action mailed 2/7/2007.

Drawings

2. Applicant's submission of replacement drawings has overcome the Objection set forth in section 4 of said previously mentioned Office action.

Response to Amendment

3. Applicant's amendments to claim 1 has obviated the rejections in sections 5-7, 11 and 12 of the previous Office action mailed 2/7/2007. Accordingly said rejections are withdrawn.

Double Patenting

4. The Double Patenting rejection of sections 8 and 9 of the previous Office action is maintained and incorporated herein by reference.

Claim Rejections - 35 USC § 102

5. The following is a quotation of the appropriate paragraphs of 35 U.S.C. 102 that form the basis for the rejections under this section made in this Office action:

A person shall be entitled to a patent unless –

(b) the invention was patented or described in a printed publication in this or a foreign country or in public use or on sale in this country, more than one year prior to the date of application for patent in the United States.

6. Claims 1 and 2 are rejected under 35 U.S.C. 102(b) as being clearly anticipated by U.S. Patent 5,918,217 to Maggioncalda et al.

Maggioncalda et al. clearly discloses a computer method for creating implementing a portfolio of investments in a single transaction by a user comprising the steps of:

selecting a portfolio of investments from a plurality of potential investment~ options (430);

adjusting a desired risk-return characteristic of said selected portfolio by adjusting a risk-return pointer (505) using a graphical user interface device; and

transmitting by the computer one or more trades to implement an adjusted the portfolio over a computer network in response to a single click of a mouse by a user (Implement button on Fig. 4) in, for example, the Abstract, Figures 1, 4-6, 9, 12.a and 12.b, and the text supporting said figures.

Regarding claim 2 and the limitation determining automatically by a processor a weighting of a plurality of instruments in the portfolio to accommodate said adjusted risk-return characteristic, see for example, Col. 9 lines 40-50

Conclusion

7. Applicant's amendment necessitated the new ground(s) of rejection presented in this Office action. Accordingly, **THIS ACTION IS MADE FINAL**. See MPEP § 706.07(a). Applicant is reminded of the extension of time policy as set forth in 37 CFR 1.136(a).

A shortened statutory period for reply to this final action is set to expire THREE MONTHS from the mailing date of this action. In the event a first reply is filed within TWO MONTHS of the mailing date of this final action and the advisory action is not mailed until after the end of the THREE-MONTH shortened statutory period, then the shortened statutory period will expire on the date the advisory action is mailed, and any extension fee pursuant to 37 CFR 1.136(a) will be calculated from the mailing date of the advisory action. In no event, however, will the statutory period for reply expire later than SIX MONTHS from the date of this final action.
